# IMPORTANT INFORMATION

## **Branding and Customization**

Full customization is available, including the development and production of custom patterns, fits, and garment constructions. All manufacturing is carried out strictly according to the client's specifications.

## **Material Selection**

We work exclusively with high quality materials. Our standard sweat sets are produced with a 380 gsm fabric weight, while custom production allows material weights ranging from 280 to 420 gsm.

## **Sample Products**

The products shown are for reference purposes only. Production is not limited to the models featured in the catalog; custom designs, fits, constructions, and additional apparel items are also available.

## **Pricing Information**

The prices listed in the catalog are indicative only. Final pricing is determined based on individual consultation and specifications. Prices may vary depending on order volume.

## **Production Process**

Production always begins following prior consultation, approved specifications, and, when required, an approved sample.
